- ★ He has a sister, Karen, who lives in St. Louis.
- ★ Delvin enjoys reading, cooking, eating and baseball.

A Message from Our President

To the optimist, the glass is half full. To the pessimist, the glass is half empty. To the engineer, the glass is twice as big as it needs to be.

As an engineer by profession, I can honestly say that I have shared all three views.

I am proud to be a State Employee and am optimistic for our future. There appears to be a mind-set shift within the leadership of the Legislature towards the State work force. I am optimistic that TPEA leadership at the State and Local levels will leverage this shift in attitude to the advantage of the Association.

The TPEA stands on the shoulders of the men and women who are now retired from State Government. I am optimistic that the 81st Legislative session will give these folks their due. Hard work will have to take place on a grass roots level. But, isn't that always the case with anything that's worthwhile.

As President of the Association, I stand ready to listen, consider, advise and help decide issues as they come before us. Thank you for the opportunity.
